

Our concepts

Food with Flavor - our meal concept

Good meals in a pleasant environment give children a sense of security and community. This helps children develop good habits and gain a basic understanding of how healthy food can contribute to good health. We offer a complete, healthy and varied diet every day.

Norlandia Jump - our activity concept

The goal is for children to develop better motor skills through daily organized physical activity. Movement gives pleasure and physical mastery, which also impacts on future reading, writing and math skills.

Go Green - sustainability and wonder

Children receive knowledge and experience so they contribute to an environmentally friendly society. We reduce food waste and the consumption of plastic, we recycle and encourage reuse. We think globally and act locally.

Welcome

NORLANDIA MOGREINA PRESCHOOL

Norlandia Mogreina preschool

"Let the discoveries begin!"

Norlandia Mogreina preschool is located in scenic surroundings close to forest and fields. We use this frequently throughout the year. Through physical activity outdoors, the children gain a sense of mastery and the uneven terrain presents children with physical challenges and strengthens their physical and mental health.

At Norlandia Mogreina preschool we are so lucky to have many different languages and cultures among both children and staff. We are very committed to enhancing the good experiences of the community. This creates strong relationships between children and adults/caregivers.

The preschool has several theme rooms such as water- and research room, and the 5-year olds have their own group. Mogreina primary school is our closest neighbor, where most of our children start first grade. This makes the transition to school easier for most children.

Norlandia Mogreina preschool has a strong focus on food and healthy diet and serves three meals a day. We have warm homemade meals twice a week and we always offer plenty of fruits and vegetables. We consider that the meal itself has a great learning potential for the children around the table. Everything from where the food comes from, cooking, setting the table, the pleasure of eating it and cleaning up afterwards. See more about our meal concept "Food with Taste" at the back of the brochure. We also take the "kitchen" with us when we are out hiking.

We play to gain knowledge!

Want to know more? Feel free to visit us, visit our website or follow us on social media. Apply for a spot on our websites or the municipality's application portal.

We dare to think big, especially about the little ones!

Our pedagogy is firmly rooted in the Preschool Act” and “The Framework Plan”, Knowledge & Innovation is our identity and working method. Every child should thrive and face varied challenges that provide a sense of mastery to become the best version of themselves.

Security and attachment

We make sure that children get off to a safe and sound start. We provide extra care and follow-up in the familiarization phase so the children experience belonging and the confidence to play, explore and learn. We meet you with warmth and respect, and offer varied days adapted to the child's developmental stages and maturity.

Preventing bullying

Everyone should be included and feel a valuable part of the community. We show consideration and respect for each other.

Playful learning

We focus on the importance of play for children's learning. We help children become more curious, explorative and creative.

Collaboration preschool - home

Parents are our most important partners. We facilitate good cooperation, through good information, participation and involvement in the best interests of the child.
